QUICK KILL

Non-Selective Contact & Aquatic Herbicide

Form: Liquid

Color: Clear, Light Yellow

Odor: Mild

pH: 4.0-6.0

Solubility (in water): Soluble
  (in mineral spirits): No data available

VOC Content (% by wt): Not determined

Flash Point: No data available

Specific Gravity: 8.43 lbs/gal.

Density: 1.01 g/cm^3

Storage Stability (at 70°F): 1 year

Ingredients	C.A.S. #
Water	7732-18-5
Diquat Dibromide	85-00-7

For control of...

- **Cattail**
- **Duckweed**
- **Algae**
- **Waterlettuce**
- **Pondweed**
- **Elodea**
- **Bladderwort**

DIRECTIONS: To kill weeds and grass on non-crop areas, use 2 1/2 gallon of QUICK KILL in 20 gallons of water (16 ounces per gallon of water). Apply as a directed spray to thoroughly wet the weeds. For best results, use a non-ionic surfactant in the spray mixture. Application may be made any time during the growing season. Repeat application as necessary. Do not water treated areas for 24 to 36 hours after application. Avoid spray contact with food crops or ornamental plants. Do not apply this product through any type of irrigation system.

Aquatic Weeds: For control of submerged weeds, dilute and inject below the water surface, or pour directly into the water while moving slowly over the area in a boat. Apply early in the season before weed growth has reached the surface. Do not apply to muddy water, and do not agitate the water excessively with outboard motor or injection equipment during application. For control of cattail, duckweed, waterlettuce and floating weeds, use 20 to 48 gallons per acre diluted with 30 to 150 gallons of water. For best results, use a non-ionic surfactant in the spray mixture. Apply as a foliar treatment before flowering of weeds or as a late season treatment. Apply to thoroughly wet weeds. Repeat application as needed.
