

ALKALINE pH ADJUSTMENT

Raises Pool pH

Form: Liquid

Color: Clear to slightly hazy

Odor: Low

pH: 14.00

Solubility (in water): Soluble
(in mineral spirits): Insoluble

VOC Content (% by weight): N/D

Flash Point (ASTM D-7821): N/A

Specific Gravity: 1.48 ± 0.05 g/cm³

Density: 12.35 ± 0.05 lbs/gal

Storage Stability (at 70°F): 1 year

<u>Ingredients</u>	<u>C.A.S. #</u>
Sodium Hydroxide	1310-73-2
Potassium Hydroxide	1310-58-3
Water	7732-18-5

Also use to...
• Raise Pool pH
• Neutralize Acid
• Maintain Drains

DIRECTIONS: The amount of ALKALINE pH ADJUSTMENT required to raise the pH depends on the water's natural buffering capacity. Add 1 to 2 quarts directly to the pool at a point of strong agitation. Do not add to the skimmer or vacuum. Allow pool water to circulate 10 to 15 minutes, and then re-test the pH to see if it falls within acceptable limits (7.2 to 7.8). If pH tests less than 7.2, repeat application.
