#### DISPOSAL:

Offer empty container for recycling. If recycling is not available, discard container in trash.

#### NFPA® RATINGS:

Health: 1; Flammability: 0; Reactivity: 0

#### CONTAINS/CAS#:

Potassium Acetate (127-08-2)  
Water (7732-18-5)  
Tripotassium Phosphate (7778-53-2)  
Tetrahydrolyltiazole (1307867-84-0)  
Sodium Metasilicate (6834-92-0)

For industrial and commercial use only.  
For additional information, see Safety Data Sheet.

#### WARNING:

This product contains, or may contain, trace quantities of a substance(s) known to the state of California to cause cancer and/or reproductive toxicity.

**FREEZY** offers an alternative to using harmful granular and liquid ice melters. Unlike traditional ice melters, **FREEZY** is biodegradable, non-hazardous and safe for the environment. It is not harmful to animals, surrounding vegetation or paved surfaces. Its formulation is enhanced with corrosion inhibitors protecting metal surfaces from rust and corrosion. **FREEZY** is clear, non-staining and will not track or leave behind unsightly residue. Its melting action does not generate any heat and can be used prior to, or after, ice and snow accumulation. This product meets the requirements of "AMS 1435B Fluid, Generic, Deicing/Anti-Icing for Runways and Taxiways", making it an ideal solution for airport ice management on runways and taxiways. It is not approved or intended for use on airplanes.

#### DIRECTIONS:

**FREEZY** is a ready-to-use liquid that should be applied at full strength. Apply liquid solution by any means of spraying, pouring or swabbing.

**Anti-Icing:** Use to pre-treat surface to prevent accumulation and bonding of snow and ice. Apply before winter storm arrives by wetting surface at a rate of a 1/2 gallon per 1,000 square feet.

**Deicing:** Application rates may vary depending on ice thickness and outdoor temperatures.

**Thin ice:** Apply at a rate of 1 gallon per 1,000 square feet.

**For ice up to 1" thick:** Apply at a rate of 3 gallons per 1,000 feet.

**NOTE:** New concrete must be cured a minimum of 90 days prior to applying **FREEZY**.

Please Recycle.
