Please Recycle.

# Floating LIFT STATION DEGREASER with Odor Control

## FLOATING LIFT STATION DEGREASER WITH ODOR CONTROL

is a pleasantly scented solvent degreaser specially formulated to dissolve grease and fast in sewer lines, lift stations and grease traps. Due to the unique design, this product floats on the surface of the water to strip fats and greases from the sides of lift stations with the rising and falling action of the water level. Built-in emulsifiers trap the debris and dissolved greases in the solvent to aid in complete removal.

## DIRECTIONS:

Use 1/2 gallon of **FLOATING LIFT STATION DEGREASER WITH ODOR CONTROL** per square foot of water surface. Apply when the lift station is at its lowest level by spraying or pouring directly down the lift station walls.

*For industrial and commercial use only.*
