

MOSQUITO DUNKS®

Biological Mosquito Control

Form: Solid

Color: Light Brown

Odor: Mild

pH: N/A

Solubility (in water): N/A
(in mineral spirits): N/A

VOC Content (% by wt): N/A

Flash Point (ASTM D-7821): N/A

Specific Gravity: N/A

Density: N/A

Storage Stability (at 70°F): 1 year

Ingredients

Bacillus thuringiensis

israelensisNo CAS Number

C.A.S. #

- | Excellent For: | |
|-----------------------|---|
| • | Country Clubs |
| • | Bird Baths |
| • | Resorts |
| • | Camps |
| • | Military Installations |
| • | Waste Water |
| • | Sewers |
| • | Old Automobile Tires |
| • | Ponds |
| • | Roof Gutters |
| • | Fish Habitats |
| • | Any other location where water collects and remains for periods of time. |

DIRECTIONS: MOSQUITO DUNKS® are formulated to release effective levels of Bti for a period of 30 days or more under typical environmental conditions. The floating action of the dunks will ensure that active material is released at the surface as well as gradually settle to the bottom. Do not apply MOSQUITO DUNKS® directly to treated, finished drinking water reservoirs or drinking water receptacles when the water is intended for human consumption.

Flooded larvae breeding sites: Use one (1) MOSQUITO DUNK® for up to 100 square feet of surface area of containerized standing water, regardless of depth. In highly polluted water with a high organic content, the application rate may have to be increased to as much as four (4) times the normal dosage based upon evaluation by the user.

Pre-Flood Treatment: Apply one (1) MOSQUITO DUNK® to each 100 square feet of containerized surface which is a known or suspected breeding site when flooded.

See Product Label for More Specific and Complete Use Directions.
